Kubernetes Cluster Detail Page	1
Cluster Overview	1

Kubernetes Cluster Detail Page

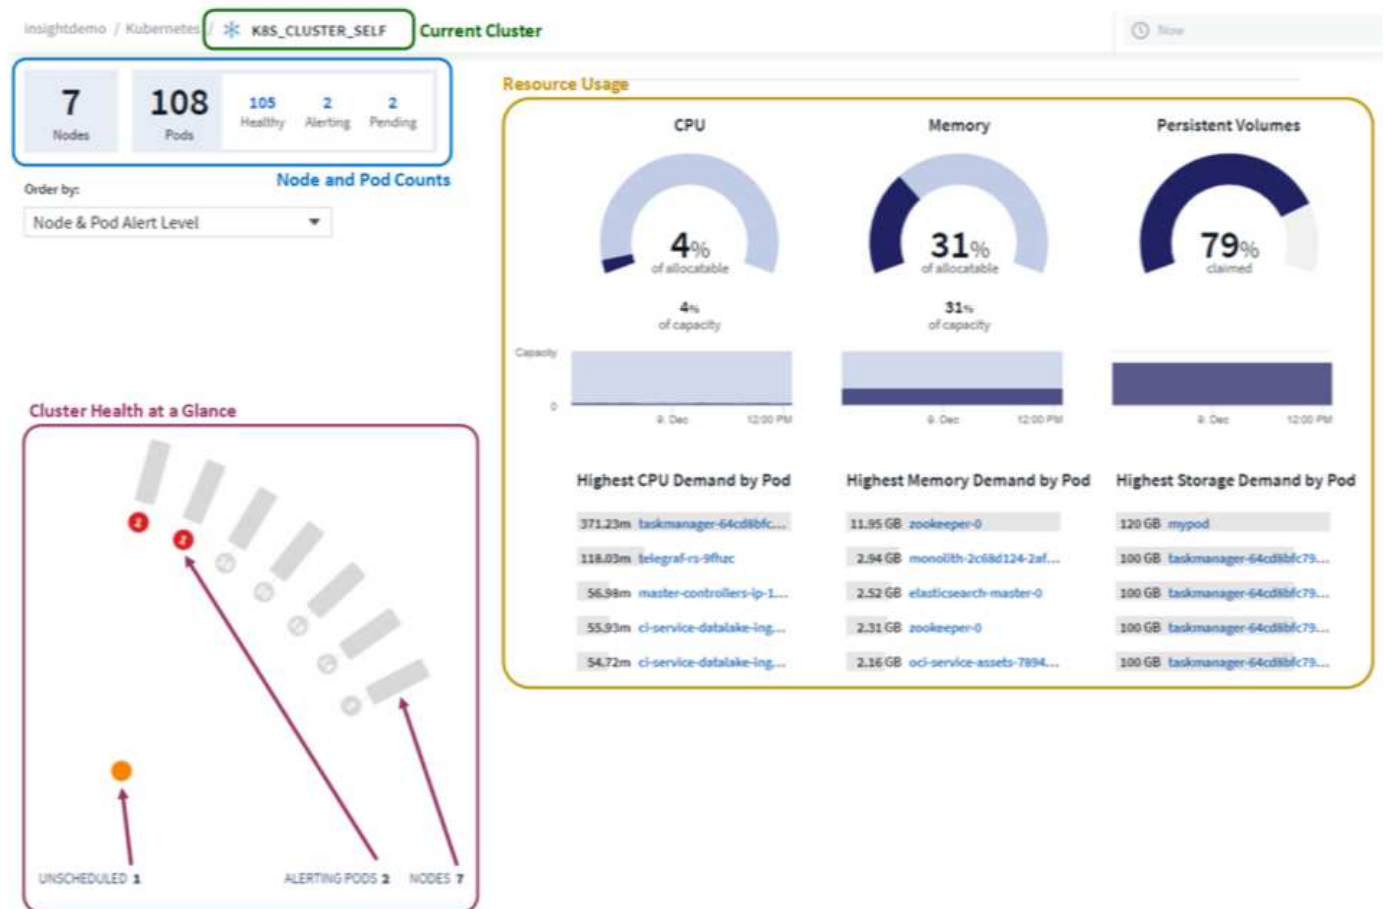

The Kubernetes cluster detail page displays detailed information about your Kubernetes cluster.

The detail page is comprised of three distinct but linked landing pages showing cluster, node, and pod information. The "Resource Usage" section changes to show the details of the selected item (cluster, node, or pod). You can see the current page type and name at the top of the screen. The current page is shown in the following heirarchy: *Site Name / Kubernetes / Cluster / Node / Pod*. You can click any part of this "breadcrumb" trail to go directly to that specific page.

My_Cl_Site / Kubernetes / * My_Cluster / ip-10-30-12-200 / ds-4dbmk

Cluster Overview

The cluster overview page provides useful information at a glance:

Node and Pod Counts

The Node/Pod counts at the top of the page show you the total number of nodes and pods in the cluster, as well as a breakdown of how many pods are currently alerting or pending.

Clicking on the pod or node in that view will zoom in to the expanded Node view.

From here, you can hover over an element to display details about that element. For example, hovering over the critical pod in this example displays details about that pod.

You can view Filesystem, Memory, and CPU information by hovering over the Node elements.

Detail Section

Each page of the Kubernetes Explorer displays a set of usage graphs that may include CPU, Memory, and Storage. Below these graphs are summaries and lists of the top objects in each category, with links to underlying details. For example, *Node* shows pods and containers, *Pod* shows PVCs and related objects and containers, etc. The following illustration shows an example of the detailed information on a *Node* page:

Status ↑			Name	Healthy Containers	Namespace
❗ Critical	Pending		demo-pod2	1 of 2	k8wheel
● Healthy	Running		ci-exclusive-node-scheduler-6dc4dd96-s6h9t	2 of 2	kafka-lake-0001
● Healthy	Running		ci-service-apikey-7676fd5f7d-ptmh9	1 of 1	oci
● Healthy	Running		ci-service-notifications-7f594c4bbd-4p7hz	1 of 1	oci
● Healthy	Running		ci-service-webui-rest-5d454c8648-98llk	1 of 1	oci
● Healthy	Succeeded		job-odata-2c68d124-2af5-4b6b-864f-f04c04e77de5-75fnf	1 of 1	oci

Resources experiencing alerts will show at the top of the lists. Click on the affected resource to drill into it for more detail.

A note about the gauges

The Memory and CPU gauges show three colors, since they show *used* in relation to both *allocatable capacity* and *total capacity*. Storage gauges only show two colors because they only show a single pair of values: *used* in relation to *total*.

Keep the following in mind when reading the gauges.

The dark blue band shows the amount used.

- When viewed against the *light blue band*, the dark blue shows used as the % of allocatable amount. This

matches the "% of allocatable" value shown (81 in the example below).

- When viewed against the *white background*, the dark blue shows used as the % of total capacity. This matches the "% of capacity" value shown (63 in this example).
