Deleting a Cloud Secure Agent

When you delete a Cloud Secure Agent, all the data collectors associated with the Agent must be deleted first.

Deleting an Agent

Deleting an Agent deletes all of the Data Collectors associated with the Agent. If you plan to configure the data collectors with a different agent you should create a backup of the Data Collector configurations before you delete the Agent.

Before you begin

1. Make sure all the data collectors associated with the agent are deleted from the Cloud Secure portal.

Note: Ignore this step if all the associated collectors are in STOPPED state.

Steps to delete an Agent:

1. SSH into the agent VM and execute the following command. When prompted, enter "y" to continue.

```
sudo /opt/netapp/cloudsecure/agent/install/cloudsecure-agent-  
uninstall.sh  
Uninstall CloudSecure Agent? [y|N]:
```

2. Click **Admin > Data Collectors > Agents**

The system displays the list of configured Agents.

3. Click the options menu for the Agent you are deleting.
4. Click **Delete**.

The system displays the **Delete Agent** page.

5. Click **Delete** to confirm the deletion.
